

Data Sheet

Product Name:	RP-54745
Cat. No.:	CS-6750
CAS No.:	135330-08-4
Molecular Formula:	C ₁₃ H ₁₂ ClNOS ₂
Molecular Weight:	297.82
Target:	Interleukin Related
Pathway:	Immunology/Inflammation
Solubility:	H ₂ O : < 0.1 mg/mL (insoluble); DMSO : 62.5 mg/mL (209.86 mM; Need ultrasonic)

BIOLOGICAL ACTIVITY:

RP-54745 is an inhibitor of macrophage stimulation and **interleukin-1** production, and a potential antirheumatic compound. **In Vitro:** RP-54745 diminishes LPS-induced interleukin-1 (IL-1) production by murine peritoneal macrophages^[1]. **In Vivo:** RP-54745 (5 mg/kg) is effective at moderating oral doses in different mouse models of induced arthritis and in the MRL/lpr mice, genetically predisposed to develop an autoimmune pathology including arthritic disorders. The clinical status of the MRL mice, and several of their disturbed biochemical and immunological parameters, improved after a 3-month treatment with RP-54745^[2].
