

## SAMPLE INFORMATION

|                                       |                                  |
|---------------------------------------|----------------------------------|
| Sample Name:                          | Acquired By: prf01               |
| Sample Type:                          | Sample Set Name:                 |
| Vial: 1                               | Acq. Method Set: Yangonin        |
| Injection #: 2                        | Processing Method: sample        |
| Injection Volume: 20.00 ul            | Channel Name: 356.0 nm           |
| Run Time: 30.0 Minutes                | Proc. Chnl. Descr.: PDA 356.0 nm |
| Catalog No: CS-4243 Batch#46834       |                                  |
| Date Acquired: 2019-8-6 10:10:29 CST  |                                  |
| Date Processed: 2019-8-6 10:52:41 CST |                                  |

### Auto-Scaled Chromatogram

### Peak Results

|   | RT     | Area     | % Area | Height (mAU) | USP Degree of Separation | USP Number of Theoretical Plates |
